

**67th International Conference on Agricultural Engineering,
LAND.TECHNIK – AgEng2009
November 6th and 7th in Hannover/Germany**

<http://www.vdi.de/landtechnik-ageng>

The 67th International Conference on Agricultural Engineering, LAND.TECHNIK – AgEng2009 will be held in Hanover (Germany) on 6 -7 November 2009, as the prelude event to AGRITECHNICA, the most important agricultural engineering fair worldwide. Under the theme “Innovations to meet future challenges” the conference will emphasize the responsibility of agricultural technology to deal with future demands in satisfying basic needs, especially the sufficient production of food and energy. The conference is organized in cooperation with the VDI Department “Max Eyth Society for Agricultural Engineering” (VDI-MEG) and the European Society of Agricultural Engineers (EurAgEng).

The topics of the conference are as follows:

- Tractors, design and dynamics, emissions, drive train, chassis, traction and test
- Power train, electric drives and mobile hydraulics
- Electronic components, software engineering and data handling
- Automation technology, locating, tracking and navigation
- Soil tillage and sowing
- Harvesting technology
- Crop protection
- Energy from biomass
- Industrial product development

The language of the Conference will be English. For more information please visit <http://www.vdi.de/landtechnik-ageng> .
