

Agricultural Technologies in a Changing Climate

The 2009 CIGR International Symposium of the Australian Society for Engineering in Agriculture

'Agricultural Technologies in a Changing Climate'
13-16th September 2009 - Brisbane Australia

Third Announcement

You are invited to register for the 2009 CIGR International Symposium of the Australian Society for Engineering in Agriculture which is titled 'Agricultural Technologies in a Changing Climate'. The symposium will be held in Brisbane, Australia.

Registration for the symposium can be undertaken through the web address
www.seag2009.com.

Please note that Earlybird registration closes on the 30th April 2009

We have received much interest both nationally and internationally with approximately 150 abstracts accepted for presentation. Key themes to be covered include

- Precision agriculture and livestock management,
- Emerging technologies and information management
- Irrigation, water and environmental management,
- Post-harvest technologies and processing
- Soil and land management
- Power and machinery

To provide a change of pace from scientific sessions, delegates and their guests will have many opportunities to meet socially and to renew or develop friendships at a Cocktail Function and the Gala Symposium Dinner.

Agricultural Technologies in a Changing Climate

A short two day post congress tour will be held following the Symposium which will take local delegates and international visitors on a tour of agricultural production and processing facilities in the South Eastern corner of Queensland. Visits to horticulture, grain, cotton and animal production systems are included with a focus on new technologies in production and processing.

A number of associated meetings will be held in conjunction with the main symposium. Sponsorship opportunities are available in the Symposium Prospectus. Alternatively you may contact the symposium secretariat at the address below.
